

Final Assessment-Database stream

Module 1: SQL Server: 20 points

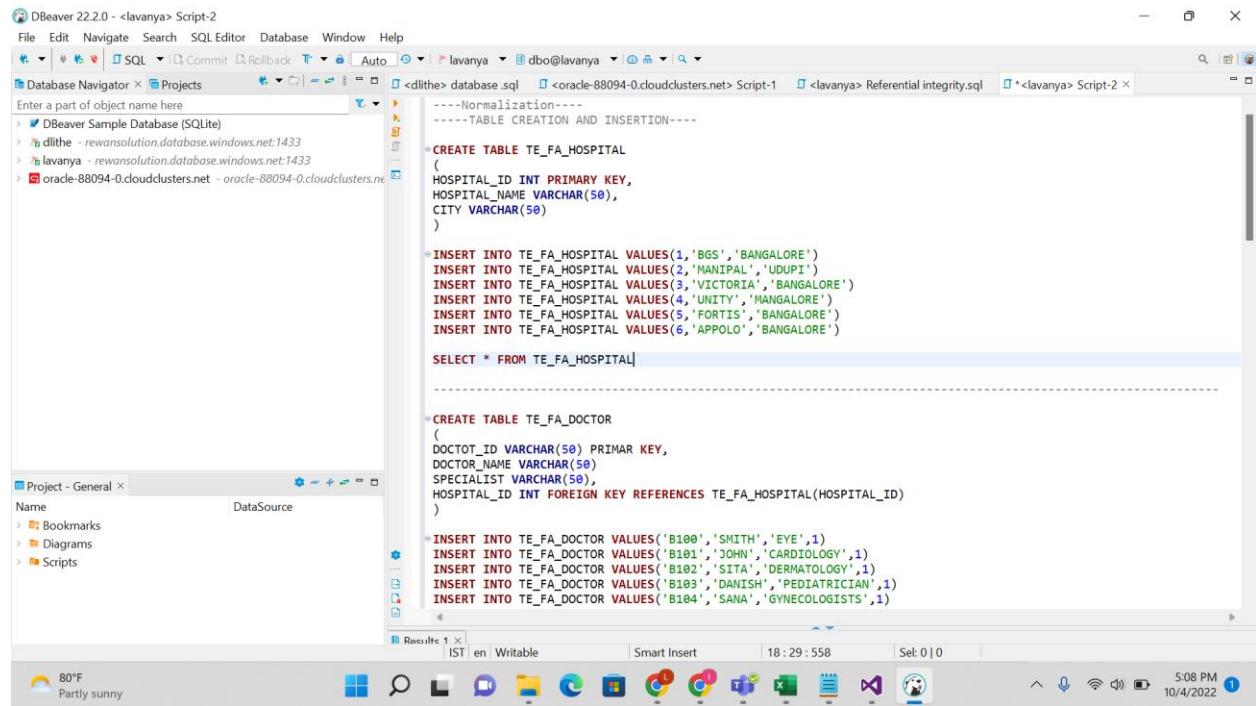

1. Perform the normalization

a) Create tables as per normalization

b) Insert the data

->Table creation and insertion:

- Hospital table with inserted values

DBeaver 22.2.0 - <lavanya> Script-2

The screenshot shows the DBeaver 22.2.0 application window. The top menu bar includes File, Edit, Navigate, Search, SQL Editor, Database, Window, and Help. The title bar indicates the current session is <lavanya> Script-2. The left sidebar features a Database Navigator with projects and connections, and a Project - General panel showing a list of bookmarks, diagrams, and scripts. The main workspace displays a results grid for a query against the 'dlithe' database. The query is:

```
SELECT H.HOSPITAL_ID, H.HOSPITAL_NAME, H.CITY, D.DOCTOR_ID, D.DOCTOR_NAME, D.SPECIALIST, H.PATI
```

The results grid contains 50 rows of data, with columns for Hospital ID, Hospital Name, City, Doctor ID, Doctor Name, Specialist, and Hospital ID. The data includes entries for Manipal hospitals in Udupi and Victoria hospitals in Bangalore, along with various doctors and their specialties.

	HOSPITAL_ID	HOSPITAL_NAME	CITY	DOCTOR_ID	DOCTOR_NAME	SPECIALIST	HOSPITAL_ID	PATI

Cloudy 78°F

The screenshot shows the DBBeaver 22.2.0 application window. The top menu bar includes File, Edit, Navigate, Search, SQL Editor, Database, Window, and Help. The title bar indicates the current session is <lavanya> Script-2. The main area features several tabs: Database Navigator, Projects, <dilthe> database.sql, <oracle-88094-0.cloudclusters.net> Script-1, <lavanya> Referential integrity.sql, and <lavanya> Script-2. The left sidebar displays a tree view of projects, databases, and scripts. The central workspace contains two large code snippets. The first snippet is a series of INSERT statements into the TE_FA_COVIDHEALTHCARE table, listing various medical conditions and their details. The second snippet is a CREATE TABLE statement for TE_FA_CINEMA, defining columns for film type, code, cinema code, total sales, and tickets sold. Below these snippets is a Results 1 panel showing the status of the last query (IST en Writable) and other metadata like timestamp and session information. The bottom of the screen shows the system tray with icons for weather, system, and network.
